

[Continue](#)

The Saturn Vue was the first "homegrown entry" by Saturn and General Motors into the small, car-based SUV market. The Saturn Vue offers a roomy cabin, extensive options and an attractive pricetag. Saturn paid close attention to consumer responses and improved the Saturn accordingly. The following guide the do-it-yourself repairperson through the installation of the throttle body in the 3.0L engine. Make sure the engine and all components are completely cool. Disconnect the battery ground. Then isolate it to avoid accidental contact with the terminal while installing the throttle body. Loosen the clamp on the air cleaner assembly and the throttle body assembly. Take off the fasteners that old the outlet resonator duct assembly on its bracket. Lift off the outlet resonator duct assembly. Drape a clean shop rag over the opening to prevent debris from falling into the manifold. Use the shop air hose to disengage any dirt or carbon deposits that collect around the base of the throttle body. Pull the electrical connector from the throttle body, then disengage the positive crankcase vent (PCV) air hose. Take off the vacuum lines for the purge and the PCV. Clamp the coolant hoses before removing them to prevent leakage. Remove the coolant hoses. Take off the bolts that hold the throttle body in place. Lift the throttle body off the manifold. Lift the shop rag carefully from the throttle body opening so that debris on the cloth does not fall into the manifold. Set a new throttle body gasket in place. Position the throttle body on the manifold. Put the bolts in place and torque them to 66 inch pounds. Reattach the hoses to the throttle body and then remove the clamps. Attach the hoses for the PCV fresh air and vacuum. Connect the electrical connector to the throttle body. Put the outlet resonator duct assembly in place, then tighten the clamp. Set the outlet resonator duct assembly on the support bracket and torque the fasteners to 89 inch lbs. Secure the clamp on the air cleaner assembly. Connect the negative battery cable and tighten the terminal bolt to 13 foot pounds. Complete the automatic relearn procedure for the Engine Control Module. Set the ignition to RUN for 1 minute to complete the relearn process. closeup of jumper cables image by Katrina Miller from Fotolia.com Extremely cold outside temperatures or leaving the lights on while the motor is off, are factors that may cause the battery in a Saturn Vue to lose its charge. In the event that this happens, you will need to perform a jump start to get the Vue up and running. Exercise caution when performing a jump start because there is a risk, albeit remote, that an explosion may occur. Open the Saturn Vue's hood and locate the terminals on the battery. Move the operational vehicle close enough to the Vue that the jumper cables can reach between them. Connect one of the jumper cables' red clamps to the positive (+) terminal on the dead battery, and then connect the other red clamp to the positive terminal on the jumper vehicle's battery. On the jumper vehicle's battery, connect a black clamp to the negative (-) terminal and then connect the other black clamp to an unpainted metal surface on the engine block to ground the connection. After five to 10 minutes, start the Saturn Vue. Idle the engine for another five to 10 minutes before disconnecting the jumper cables. Disconnect the jumper cables by reversing the above steps. Close the hood. The jump start process is now complete. seat belt receptacle image by Albert Lozano from Fotolia.com The Saturn Vue is a midsize sport utility vehicle that allows you to sacrifice third-row seating for cargo space, making it possible to carry more in your SUV. If you need additional space in your Vue, you can fold down the rear seat and remove it from the vehicle. The rear seat in the Vue is heavy, so be careful when removing it from the vehicle; do not lift more than you can carry. Unbuckle the safety belts and secure them near the sides of the vehicle. Folding the rear seat while the safety belts are attached can damage the belts and reduce their effectiveness. Locate the seat folding lever on the back or the top of the rear seat. Pull the lever to release the seat back and fold it forward toward the front of the car until the lever clicks into place. Locate the release latch on the bottom of the rear seat. Pull the release latch to detach the bottom of the seat from the floor of the car. Lift the rear of the seat up out of its slots. Pull the seat toward the back of the car to disengage the hooks connecting the front of the seat to the floor of the car. Remove the seat from the car and set it aside. UPDATE, 10/29/19: PlayStation Vue will not be available much longer, according to a blog post from Sony. For a while, though, it was one of the best cable replacement services on the market.PlayStation — it's not just for gaming anymore. In addition to being a solid Blu-Ray player when the occasion calls, you can also use your console to play music or rent a few of your favorite movies. But did you know you can also stream Live TV? Thanks to Sony's PlayStation Vue service, you can watch Better Call Saul, Scandal or Penny Dreadful and still get your regional news and sports. The following guide will help you navigate your console's newest feature with relative ease. Just save us a spot on the couch.What is PlayStation Vue? PlayStation Vue (opens in new tab) is Sony's streaming media service, designed to compete with the likes of Sling TV, DirecTV Now, Hulu With Live TV and YouTube TV, to help you cut the cable cord.Vue offers several key features. For instance, My Shows allows viewers to save their favorite programs and store them in the cloud for up to 28 days. Best of all, you'll never have to sacrifice recording several shows or movies, because they're airing at the same time.In an attempt to make content discovery easier, you have Explore, which utilizes adaptive filters to search by genre, length and rating. Or if you want your favorite shows and movies front and center, the Favorite Channel places those shows at the top of your guide queue. The Timeline feature keeps track of your viewing habits, creating a personalized list of recommendation for you on the home screen.How much does PlayStation Vue cost?Sony offers couch potatoes four tiers of plans with which to satiate their need for quality binge watching. The service announced the pricing listed below on July 1, in a blog post stating that the prices of each tier will rise by \$5.The Access plan starts at \$49.99 per month and has 48 popular channels including ABC, CBS, FX, SyFy and Cartoon Network along with ESPN, ESPN2 and Disney Channel.The Core plan costs \$54.99 per month and has 66 channels and expands the ESPN offerings to ESPN and ESPNNews. There's also NFL Network, NBC Golf, and the Yankee-centric YES, which should sit well with sports fans.Elite plans start at \$64.99 per month. This is for hardcore TV buffs, giving viewers 89 channels, including specialty channels such as Machinima, NatGeo, Pop, Logo, MGM and Boomerang.The \$84.99 Ultra package, for those who don't want to give up much when cutting the cord, packs in more than 90 channels, including Showtime and HBO.HBO is a \$15 per month add-on, while Showtime and Epic Hits are available as add-ons for \$10.99 and \$2.99 per month, respectively, or bundled together for \$13.99.Cinemax and Fox Soccer Plus are available for \$15.00 and \$12.99, respectively, per month.Vue's Core package includes more than 75 HD channels, including some sports networks. Your specific channel package may differ, as Sony notes that live-broadcast feeds may not be available for "consumers in some zip codes." In lieu of a live feed of those ABC, CBS, FOX, and/or NBC affiliates, subscribers will get an On Demand channel of that channel's "top programming," which does not include live sports.Sling TV also offers live TV, but at a more palatable \$25 month. For that amount, you'll gain access to a base 29 channels dubbed the Orange package, including AMC, ESPN and CNN. DirecTV NOW starts with a \$50 per month Live a Little package with more than 60 channels, including MTV, Comedy Central, and TNT.MORE: Hulu Live vs. YouTube TV vs. Sling vs. Vue vs. DirecTV Now: Face-Off!Hulu With Live TV starts at \$45 per month for more than 50 channels, and includes Hulu's original programming. YouTube TV starts at \$50 per month, and includes an excellent cloud-based DVR and more than 50 channels. Amazon Channels allows users to buy à la carte channels, but only after getting a Prime membership.Where is PlayStation Vue available?Vue is available in all 50 states.Does Vue have any local channels? What about premium?Sony states that the service features many local stations, including local sports and weather channels. However, depending on your location, you might miss out on some of your favorite stations. Sling TV has added Local Now by the Weather Channel to its base offerings that provide local news, sports, traffic updates in addition to the weather.MORE: Netflix vs. Hulu vs. Amazon Prime: Streaming ShowdownVue offers several premium channels for a separate upcharge for PlayStation Plus subscribers. For instance, Showtime (\$8.99), Epic Hits (\$2.99), Machinima (\$1.99) and Fox Soccer Plus (\$12.99) are all options. The service also offers a \$11.49 premium pack that consists of Showtime and Epic Hits. Non-members can tack on an extra \$2 on to those prices.Will I still have to watch commercials?Similar to Sling TV, you'll have to sit through commercials while watching the Vue, because you're watching live television. You will, however, have the ability to fast forward if you DVRed the program. The Vue is beholden to any and all blackout rules that traditional channels are subject to. What kind of bandwidth will I need?To go the best Vue experience, you'll require internet bandwidth of 10Mbps or higher for a single stream. An additional 5Mbps will be necessary for each stream. Compare that to Sling TV, which only requires 3Mbps to stream non-HD content on mobile devices and 5Mbps for a single HD stream. The number jumps to 25Mbps when you start streaming Sling TV to more than one device. What devices are supported?You can use Vue on Amazon Fire, Android, the Apple TV, Chromecast, the PlayStation 3 and PS4 and iOS devices (the iPhone and iPad). It's missing the Nintendo Switch (which Hulu With Live TV is on), Xbox consoles (which support YouTube TV and Hulu). YouTube TV is also on smart TVs from LG and Samsung, and Sling TV also supports select Samsung Smart TVs.Can I watch Vue outside of my home?On Feb. 27, PS Vue got a lot better for mobile users. Now, when you're away from home, you'll be able to keep tabs on your hometown's local sports games. Also, you'll be able to watch the local broadcast networks for the city you're in, rather than your home channels. Still, select channels are unavailable on mobile devices, marked as Mobile Restricted, so you won't get everything everywhere. The PS Vue app grants access to 40 pre-selected live channels for viewing on the go. You'll also have access to shows captured using Catch Up as well as On Demand programs. You'll need an active Vue account with a set home location (determined by entering your zip code) to watch the service on mobile devices.Certain channels, such as Bravo, Chiller Oxygen, E, MSNBC, SyFy and USA, aren't available on mobile devices. These shows or channels will feature a Mobile Restricted badge when you attempt to access them in the mobile app. MORE: PS4 vs. Xbox One: Which Console is Right for You?Can I set up multiple Vue accounts?Sony has a more-the-merrier approach, supporting up to five profiles on a single Vue account. Similar to Netflix, every account will feature its recommendations, settings and Favorite Channels. But there aren't any child-friendly profile options.Can I run multiple streams?One Vue account can support one PS4 and PS3 streaming simultaneously. Strangely enough, the same can't be said if you have two of the same PlayStation system in one household. One the mobile front, you can support up to five simultaneous streams.At one point, PS Vue limited its number of concurrent streams depending on how you registered for the service, with those signing up via mobile devices getting only three streams, but those users now also get 5 streams. Most competitors limit you to 2 (DirecTV NOW, Hulu With Live TV) or 3 (YouTube TV) concurrent streams, while Sling gives you 1 stream with its Orange package, 3 streams with its Blue package (both \$25 per month), and 4 with its \$40 per month Orange + Blue package.Are there parental controls?Vue doesn't currently offer parental controls, but Sony is referring viewers to its Explore feature as a way to keep things rated G or PG for the younger members of the household.You can also check out ratings in the program details, but that can get a bit tedious after a while. Sling TV was kind enough to include parental controls in an easy-to-access menu across all of its iterations.What about PS Vue's DVR?PS Vue My Shows list allows you to save programming to your personal list for a maximum of 28 days after they air. Unfortunately, PS Vue notes that "Due to streaming rights, however, select channels and programs cannot be recorded to the DVR." Hulu With Live TV and YouTube TV both offer less-limited DVR options, with content stored for 90 days on the latter. DirecTV Now is about to roll out its DVR, which is currently in Beta. Sling TV makes you pay \$5 extra for its DVR.How is Vue different from Sling TV and other alternatives?PlayStation Vue's starting price is higher than Sling's, but it does offer many more channels at that opening rate.Hulu With Live TV and YouTube TV both offer less-limited DVR options than PS Vue, but PS Vue allows more simultaneous streams than any competitor.
